Art Unit: 3634

1. The abstract of the disclosure is objected to because of the inclusion of legal phraseology "means", "comprises". Correction is required. See MPEP § 608.01(b).

2. On page 3 of the specification reference is made to figures 2a and 2b. However, there are no drawing figures labeled figure 2a and figure 2b
Correction is required.

3. Claims 1-6 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

These claims are replete with recitations for which there meaning is not understood and further appear to contain idiomatic/grammatical errors. For example: claim 1, lines 1-2 "means of an insect-repellent gauze screen" which is a means clause devoid of a statement of a specified function, lines 4-5 "is accommodated", line 7 "which possess a", line "securing means so as to" which is a means clause devoid of a statement of a specified function, line 12 "in particular", line 12 "decorative parts present"; claim 5, line 3 "in cooperation with"; claim 6, line 4 "possess a section".

These claims are replete with terminology for which there is no antecedent basis. For example: claim 3, line 2 "the

longitudinal direction", line 3 "in mounted condition", line 4 "the inner wall"; claim 5, line 2 "the direction", line 3 "the opposite side".

Furthermore, these claims are narrative in form and replete with functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371⁰ of this title before the invention thereof by the applicant for patent.

Claims 1-6 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Poppema. Poppema discloses the claimed invention including a screen 118, a roller rod 120, a pulling beam 115.
